

Two-column reading order

Expected order: title, left column top-to-bottom, then right column top-to-bottom.

LEFT COLUMN

L1

Aster begins the first narrative. It must precede every token in the right column.

L2

Birch continues underneath Aster. The gutter is intentionally wide and empty.

L3

Cedar closes the left column before reading jumps back to the top on the right.

RIGHT COLUMN

R1

Dahlia begins only after Cedar. A geometric reading order would incorrectly interleave it.

R2

Elm follows Dahlia. Each block carries a stable identifier for exact scoring.

R3

Fir is the final block on this page. Expected sequence ends with token R3.
